REACH COMPLIANCE STATEMENT

Registration, **E**valuation, **A**uthorisation and Restriction of **Ch**emical substances

Dear Customer

REACH is the European community regulation on chemicals and their safe use (EC 1907/2006). It deals with the Registration, Evaluation, Authorisation and Restriction of Chemical substances. The new law entered into force on 1st June 2007.

This requires manufactures or importer of chemical / substances to register their products with the agency set up for this purpose. Substances not registered will not be allowed to be sold in Europe.

A list of restricted substances of very high concern (SVHC) is reviewed and published on the European chemicals agency (ECHA) website, the most recent being ECHA/NR/24/01. This updated list now contains 240 listed substances.

PW Circuits is a "downstream user" as defined in the REACH regulations, sourcing all of it's substances for manufacturing (even in mixture or preparation form) from E.C suppliers. We are ensuring that all substances used in normal manufacturing processes are registered by their suppliers for their correct use.

We have determined:

- **All suppliers are aware of the regulations.**
- **Suppliers have registered their products where required.**

Should we become aware of any change to this situation, we will immediately take steps to:

- **Notify our customers and,**
- **Minimise disruption to continuity of supply.**

PW Circuits Ltd confirms that none of it products supplied contain any of the 240 substances of Very High Concern (SVHC) from the ECHA/NR/24/01 candidate list, in the concentration above the 0.1% limit by weight.

More information on REACH and the European Chemicals Agency can be found on the ECHA website http://echa.europa.eu
