

AKAFLEX® PENCL HT: Copper laminates on a PEN-film backing for flexible printed circuits

The AKALEX® PENCL HT programme

AKAFLEX PENCL HT is available from KREMPPEL as

- ✓ two-layer laminates and
- ✓ three-layer laminates.

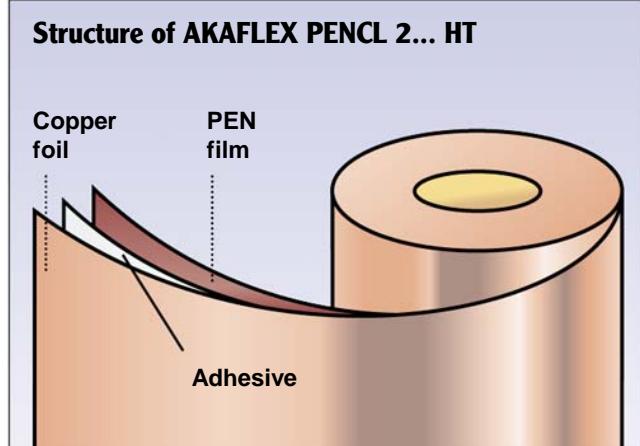

A polyethylene-naphthalate film (PEN) is used as the backing material for the copper. This is laminated on one or both sides with electrolytic (ED) copper foil. AKALEX PENCL HT is characterised by its lasting stability to high temperatures compared to PET-Laminates. PEN-film laminates of different dimensional stability (HT2 and HT3) or with special copper foils are available on request.

A modified epoxy system characterised by very good temperature stability has been developed for the HT product family. In combination with polyimide film, the bonding system used here reaches a temperature index per UL 796 of 150°C.

AKAFLEX PENCL HT is manufactured from PEN film and copper foil of differing thickness grades. The various types are identified in the product designation by letters and combinations of numbers.

Designation for a two-layer laminate

AKAFLEX PENCL 2-00/00 HT 2		
Two-layer laminate with PEN film		
Thickness of copper foil, in µm		
Thickness of the PEN film, in µm		
High temperature HT adhesive		
Regular dimensional stability		
e.g.: AKALEX PENCL 2-35/50 HT 2		

Standard types of AKALEX® PENCL HT

Standard-type designation	Thickness of copper foil	Thickness of PEN film
Two-layer laminates		
PENCL 2-17/50 HT 2	17 µm	50 µm
PENCL 2-35/50 HT 2	35 µm	50 µm
PENCL 2-35/75 HT 2 Regular dimensional stability (MD/TD ≤ 0.7%)	35 µm	75 µm
... with PEN film of higher dimensional stability		
PENCL 2-17/50 HT 3	17 µm	50 µm
PENCL 2-35/50 HT 3	35 µm	50 µm
PENCL 2-35/75 HT 3 High dimensional stability (MD/TD ≤ 0.3%)	35 µm	75 µm

Processing AKALEX® PENCL HT

AKAFLEX PENCL HT can be processed »reel to reel« by screen-printing or photolithography and the standard etching and cleaning techniques. The technical advantages in manufacturing are assured in this way.

A comprehensive range of **coverlays** for mechanical protection of the etched circuits is available from KREMPEL.

Quality assurance

All AKALEX products are subject to the procedures of on-going quality control as defined in the Quality Assurance Handbook of August Krempel Soehne. This quality assurance system is certified as meeting the requirements of ISO 9001 and ISO/TS 16949. For AKALEX PENCL HT, testing is performed on the master reels according to the methods given in IPC-TM 650. The test results are evaluated in accordance with IPC-4204/23.

Availability of AKALEX® PENCL HT

- ✓ **Standard reel width:**
1350 mm, 1100 mm or 1000 mm;
other widths on request
- ✓ **Standard reel length:**
100 m;
other lengths on request
- ✓ **Format:**
As requested by the customer
- ✓ **Packaging:**
Reels packed suspended in robust corrugated-cardboard cartons
- ✓ **Standard cores:**
Inside diameter 76 mm
- ✓ **Certificate:**
Test certificate according to EN 10 204 - 2.2.
