

# Nelco® N4000-29

## Advanced Lead-Free, High-Tg Multifunctional Epoxy

*Park's N4000-29 is an advanced, lead-free, low-CTE, high Tg (185°C by DSC) multifunctional epoxy dielectric substrate. This material has been designed for use not only in standard multilayer PWB designs, but for today's toughest, high-performance, lead-free applications.*

### Key Features

#### Low Z-axis expansion

- Reduced expansion improves through-hole reliability
- Excellent for high layer count assemblies
- Designed to withstand multiple reflow excursions and repair operations

#### High Tg, excellent thermal stability and moisture resistance

- Improved lead-free assembly compatibility
- Proven IST testing results
- Exceptional peel strength
- Suitable for high-layer count, sophisticated PWB designs

#### CAF Resistant

- Providing long term reliability in end products

#### Proprietary resin chemistry

- Extremely low Z-CTE
- Improved thermal stability, CAF and moisture resistance when compared to traditional FR-4

#### Superior electrical properties

- Supporting advanced technology PWB designs

#### Optimized FR-4 processing

- Superior rheology providing consistent controlled flow and superior via topography
- 75 min press at 185°C and 200-300 psi

#### And Much More

- Vacuum laminated
- Available in a wide variety of constructions, copper weights and glass styles including standard copper, double treat and RTFOIL® laminate
- Available down to 1.2 mil core.
- Meets UL 94V-0 and IPC-4101/98, /99, /126 and /129 specifications\*
- RoHS compliant

### Applications

- Advanced Lead-Free Assembly Substrate
- Large Format Backplanes
- Tight Tolerance Via to Via Applications
- High I / O Count BGA Substrates
- Extreme Layer Count Multilayers
- Lead-Free DCA Applications
- High Temperature Underhood Automotive
- Telecommunications Infrastructure

**Park's UL file number: E36295**

\* material also meets the specifications of IPC-4101/26 and /83 unfilled slash sheets.
